

1. Establishment of Artificial Insemination Equipment and AI Data:

Artificial Insemination equipment was installed in NSFDC working region to facilitate doorstep goat AI services to goat farmers. Equipment details are as follows:

Sno.	Particular	Units
1	LN2 Cylinder 35ltr	1
2	LN2 Cylinder 3ltr	1
3	AI Kit	1
4	Castrator	1

Large LN2 cylinder helps keep AI semen doses safe for 1 month. Small cylinder offers cold chain for logistics support during field AI. The equipment is sufficient for successful goat AI in NSFDC working region.
